INTERNAL EXAMINER **EXTERNAL EXAMINER**

TABLE OF CONTENTS

List of Figures 7

List of Tables 8

List of Standards 9

CHAPTER 1. INTRODUCTION 11

1.1. Identification of Client/ Need/ Relevant Contemporary issue 11

1.2. Identification of Problem 11

1.3. Identification of Tasks 11

1.4. Timeline 11

1.5. Organization of the Report 11

CHAPTER 2. LITERATURE REVIEW/BACKGROUND STUDY 12

2.1. Timeline of the reported problem 12

2.2. Existing solutions 12

2.3. Bibliometric analysis 12

2.4. Review Summary 12

2.5. Problem Definition 12

2.6. Goals/Objectives 12

CHAPTER 3. DESIGN FLOW/PROCESS 13

3.1. Evaluation & Selection of Specifications/Features 13

3.2. Design Constraints 13

3.3. Analysis of Features and finalization subject to constraints 13

3.4. Design Flow 13

3.5. Design selection 13

3.6. Implementation plan/methodology 13

CHAPTER 4. RESULTS ANALYSIS AND VALIDATION 14

4.1. Implementation of solution 14

CHAPTER 5. CONCLUSION AND FUTURE WORK 15

5.1. Conclusion 15

5.2. Future work 15

List of Standards (Mandatory For Engineering Programs)

Standard	Publishing Agency	About the standard	Page no
IEEE 802.11	IEEE	IEEE 802.11 is part of the IEEE 802 set of local area network (LAN) technical standards and specifies the set of media access control (MAC) and physical layer (PHY) protocols for implementing wireless local area network (WLAN) computer communication.	Mention page nowhere standard is used

Note: Text in Red is presented as an example (replace with relevant information)

CHAPTER 1.
INTRODUCTION

1.1. Identification of Client /Need / Relevant Contemporary issue

- Justify that the issue at hand exists though statistics and documentation
- It's a problem that someone needs resolution (Client/consultancy problem)
- The need is justified through a survey or reported after a survey
- Relevant contemporary issue documented in reports of some agencies

1.2. Identification of Problem

Identify the broad problem that needs resolution (should not include any hint of solution)

1.3. Identification of Tasks

Define and differentiate the tasks required to identify, build and test the solution. (Should be able to build a framework of the report, identify the chapters, headings and subheadings)

1.4. Timeline

Define the timeline (preferably using a Gantt chart)

1.5. Organization of the Report

Give a brief what should be expected in each of the chapters

CHAPTER 2.
LITERATURE REVIEW/BACKGROUND STUDY

2.1. Timeline of the reported problem

As investigated throughout the world, when was the problem identified, documentary proof of the incidents.

2.2. Existing solutions

Brief of the earlier proposed solutions

2.3. Bibliometric analysis

Analysis based on (key features, effectiveness and drawback)

2.4. Review Summary

Link findings of literature review with the project at hand.

2.5. Problem Definition

Define the problem at hand including what is to be done, how it is to be done and what not to be done

2.6. Goals/Objectives

Statements setting the milestones during the course of project work.
Keeping in mind

- Narrow, specific statements about what is to be learned and performed
- Precise intentions
- Tangible
- Concrete
- Can be validated or measure

CHAPTER 3.
DESIGN FLOW/PROCESS

3.1. Evaluation & Selection of Specifications/Features

Critically evaluate the features identified in the literature and prepare the list of features ideally required in the solution.

3.2. Design Constraints

1.1.1. Standards:

Regulations/Economic/Environmental/Health/manufacturability/Safety/Professional/ Ethical/Social & Political Issues/Cost considered in the design.

3.3. Analysis of Features and finalization subject to constraints

Remove, modify and add features in light of the constraints.

3.4. Design Flow

At least 2 alternative designs/processes/flow to make the solution/complete the project.

3.5. Design selection

Analyze the above designs and select the best design based supported with comparison and reason.

3.6. Implementation plan/methodology

Flowchart/algorithm/ detailed block diagram

CHAPTER 4.
RESULTS ANALYSIS AND VALIDATION

4.1. Implementation of solution

Use modern tools in:

- analysis,
- design drawings/schematics/ solid models,
- report preparation,
- project management, and communication,
- Testing/characterization/interpretation/data validation.

CHAPTER 5.
CONCLUSION AND FUTURE WORK

5.1. Conclusion

Should include expected results/ outcome, deviation from expected results and reason for the same

5.2. Future work

Should include the Way ahead (required modifications in the solution, change in approach, suggestions for extending the solution.
